

Physics Division ESH Bulletin 99-7

LASER SAFETY

Just a reminder

Any purchase, removal, or relocation of a Class 3 or 4 laser needs to be documented in the Physics Division Laser Inventory. This inventory, which includes all Class 3 and 4 lasers in the division, is maintained by Charlie Havener, the Division Laser Safety Officer (DLSO). Please check the laser inventory and confirm that all information is correct. We hope to post this inventory on the www for your convenience very soon.

Remember, a laser cannot be operated without a current inspection from the DLSO. After a successful inspection, the laser is classified as operational and that status is recorded in the inventory.
