

PANEL ON INCREASING THE VISIBILITY AND PUBLICITY FOR DATA ACTIVITIES AND ASSURING THE OPEN EXCHANGE OF DATA¹

D. R. Schultz

This panel was charged with leading and stimulating discussion regarding two principal issues: (1) the need to increase the visibility of atomic data production and collection activities in recognition of their role as vitally important resources for diverse applications, and (2) the need to assure the open exchange of this data. Comments by the panelists, supplemented by interaction with the audience, are summarized here along with the principal conclusions.

1. Abstract of published paper: Proceedings of the International Conference on Atomic and Molecular Data and Their Applications, Sept. 29-Oct. 2, 1997, NIST, Gaithersburg, MD, AIP Conf. Proceedings **434**, 397 (1998).
